

Nutricia

Nutrition for environmental management

Nutricia specialises in the delivery of advanced medical nutrition for the very young, the old and the sick. As well as being the largest specialist nutrition company in Europe, Nutricia is the market leader in the UK.

They supply high quality feeds, systems and support services to patients and health care professionals. Through their Nutricia Homeward service, they deliver nutritional feeds, enteral feeding systems and nursing care directly to patients' homes.

Nutricia initially employed Assurity Consulting to carry out a legal compliance check for their ISO 14001 EMS in 2013. After an all round good experience, they had Assurity Consulting do the same in 2015 as well sign up for their quarterly legislation update.

"I was impressed at how quickly Jake and Kim from Assurity Consulting understood the complexity of our site and were able to make such a detailed report after their few days here, which demonstrates the depth of their knowledge and experience. All of the reports, check sheets and action lists produced are clear, precise and detailed enough to make sure complete compliance if followed correctly and kept up to date.

Legal Compliance can be complex but Assurity have made it really easy for us by taking a lot of hard work away whilst still keeping us involved throughout the whole process. I am completely confident with the work they have done and look forward to continue working with them in the future."

Stephanie Lewin, Environmental Advisor, Nutricia.
